

Index

Page numbers followed by “*t*” and “*f*” refer to tables and figures.

- A**
accidents, 25, 27*f*, 35, 40–43
approvals
 federal, 48–51
 provincial, 53
- B**
biomass fuel technologies, 20
- C**
Canadian Energy Research Institute (CERI), 46, 47
Canadian Nuclear Safety Commission (CNSC), 48
CANDU reactors
 costs, 45
 development and deployments, 24–27
 economic activity from, 46, 47
 fuel use, 31–32
 nuclear fuel cycle, 29*f*
 See also nuclear reactors
carbon capture and storage, 16–17, 53
CERI (Canadian Energy Research Institute), 46, 47
Chernobyl accident, 25, 27*f*, 35, 42–43
closed fuel cycle, 30
CNSC (Canadian Nuclear Safety Commission), 48
CO₂ emissions, 15–21, 28, 52–53
 See also carbon capture and storage
coal plants
 labour costs for, 46
 radioactivity in, 36
 technologies, 16–17, 21*t*
commercial sector energy demand, 13
community impacts, 47, 53
construction of nuclear power plants
 license application, 50
 requirements, 45–46
Control, Cool, and Contain (3 Cs) function, 39
Convention on Nuclear Safety, 38
costs
 allocations to users, 44
 decommission funding, 50
 by energy technologies, 15–21
- D**
decay of nuclear waste, 32–33
decommission funding, 50
defence-in-depth levels, 38–39
demand-side management, 20
disposal of nuclear fuel, 34
 See also waste management
- E**
electricity demand, 12–13, 14, 20
employment impacts, 45–46
energy technology comparisons, 15–21
environmental assessment review, 49–50
environmental impacts comparisons, 15–20, 21*t*, 52–53
- F**
fission products, 31–32, 33*f*
fossil fuel plants, 16–18, 21*t*
- G**
generating capacity
 installed, 13
 of power plants, 15–20
geothermal energy, 20
gross domestic product (GDP) impacts, 47
- H**
health studies, 36, 37*t*, 42–43
hydroelectricity, 19–20
- I**
IAEA (International Atomic Energy Agency), 34, 38, 48
IGCC (Integrated Gasification Combined Cycle), 17, 21*t*
industrial sector energy demand, 13
infrastructure requirements, 45
INPO (Institute for Nuclear Power Operations), 41
Institute for Nuclear Power Operations (INPO), 41
Integrated Gasification Combined Cycle (IGCC), 17, 21*t*
International Atomic Energy Agency (IAEA), 34, 38, 48

L

labour requirements, 45–46
land use requirements
 by energy technologies, 15–20
 for fuel disposal, 34
legislation, 49*t*
licensing, 48–51
local impacts, 47, 53

N

natural gas, 17–18, 21*t*
nuclear fission
 process, 22–23
 products, 31–32, 33*f*
 safety design for, 39–40
nuclear fuel cycle, 29–34
nuclear power
 as energy option, 15–16
 fission process, 22–23
nuclear power plants
 construction, 45
 developments and deployments, 24–27
 impacts for Alberta, 44–47
 licensing, 50–51
nuclear reactor fuel
 disposal, 34
 fabrication and fission, 31–32
 recycling, 32–33
 See also uranium
nuclear reactors, 23–27
Nuclear Waste Management Organization
 (NWMO), 34
nuclear weapons, 23, 24
NWMO (Nuclear Waste Management
 Organization), 34

O

oilsands
 electricity demands, 14
 reactors for, 27
open fuel cycle, 29*f*, 30
operating license application, 50
operating reserves, 44

P

Phased Adaptive Management, 34
plutonium, 31, 34
power plants in Alberta, 13, 22*f*
private sector investment, 12

R

radiation exposure
 Chernobyl studies on, 42–43
 containment, 39, 40
 natural and man-made, 35–37
recycling of reactor fuel, 32–33
regulations, 48–51
renewable energy technologies, 18–20
residential demand, 13, 14
resources for nuclear power plants, 45
revenues from nuclear power, 46, 47

S

safety, 27, 35–43, 52
security, 27, 34, 40
social issues, 47, 53
solar power, 18–19
storage facilities, 34, 43

T

3 Cs function, *See* Control, Cool, and Contain
Three Mile Island accident, 25, 27*f*, 41
transmission grid, 44

U

uranium
 mining and milling, 30
 in reactors, 23, 24–25
 weapons-grade, 34
 See also nuclear reactor fuel

W

WANO (World Association of Nuclear
 Operators), 43
waste management, 34, 43
waste materials
 non-fuel products, 43
 in reactors, 32–33
 security by reactor design, 27
water power, *See* hydroelectricity
water use
 by energy technologies, 15–21, 28
 in reactors, 22*f*, 23, 24–25
 for spent fuel, 32
wind power, 18
World Association of Nuclear Operators
 (WANO), 43

Y

yellowcake, 30
